Will Rogers Remarks:
MIAMI BEACH (Fla.) Feb. 6.—(To Editor of The Times.) See by the Florida papers today that California had another earthquake yesterday. I rushed down to the Miami News to see what details they had, for my family is out there. In looking it up we couldn't find any details, but we found on the press the story of the earthquake that we are having today out there, and that will be in tomorrow's paper. So I am not going to get excited till next Friday's earthquake. That's the day they report a big one. The Mayor of a shake-town.
WILL ROGERS.
CORNER MAY TAKE STOCK OFF MARKET
Suspension of Trading in Wheeling and Lake Erie Regarded Probable
NEW YORK, Feb. 6. (P.)—The New York Herald-Tribune will say tomorrow that suspension of trading in Wheeling and Lake Erie corner stock on the New York Stock Exchange looks as a possibility of the near future as a result of creation of a virtual corner in the stock. The unusual condition resulted from the fact that the corner was bought by the company's stockholders in the corner stock on the provision in the company's charter that it can be converted into shares in common stock. The company's stockholders are now in a position to convert their shares into common stock at will. The company's stockholders are now in a position to convert their shares into common stock at will. The company's stockholders are now in a position to convert their shares into common stock at will.

CHINA NOTE REVEALED
Neutrality Zone Demanded
Secretary Kellogg Imposes Terms for Withdrawal of Alien Troops
Protection of Foreigners at Shanghai Keynote of New Message
SHANGHAI, Feb. 6. (Ex-clusive)—The text of the American note to the Chinese war lords, made public by the State Department tonight, declares that the United States has made a move of vital importance in the relations of the western powers with China.
In this note President Coolidge proposes that the international settlement in Shanghai be eliminated from the area of warlike activities on the part of the factions contending for the mastery of that important port.
If the Chinese generals should "cede to this request, the problem confronting the United States, Great Britain and other powers in dealing with the situation in China would be greatly simplified. It might not be necessary to send troops in large numbers for the protection of foreigners in Shanghai."
MAY WITHDRAW
The British already have landed Indian troops at Shanghai and have dispatched 15,000 more soldiers from England. The Cantonese have refused to negotiate with Great Britain, and the British troops are withdrawn from Shanghai. If the American plan of neutralization of the international settlement should be adopted Great Britain might withdraw the forces already landed and direct them on the way.
From administration sources, it is learned that if the Chinese general comply with the President's request and abide by its terms, American troops already in China will not be landed at Shanghai.
If, however, the heads of the Chinese factions reject Mr. Coolidge's proposals, the United States, Great Britain and other powers will be compelled to send troops to Shanghai for the protection of their nationals. It would then be necessary for the powers to act collectively as they did in the Boxer uprising, and armed conflict between the western nations and the Chinese would be inevitable.

FILIPINO AGITATOR BEATEN
Aguinaldo Wins Political Victory for United States in Having Quezon Put Out of Veterans Association
MANILA, Feb. 6. (Ex-clusive)—Gen. Emilio Aguinaldo, the leading Filipino patriot and commander-in-chief of the Philippine army in the war against the United States, today won his most important victory in the history of the American occupation.
Gen. Aguinaldo not only won his re-election as president of the Veterans' Association of the Philippines, but he also secured the expulsion of Manuel L. Quezon, President of the Philippine Senate and arch-political enemy of the United States. The re-election and the expulsion were unanimous.
The action of the convention was a representative one. Several hundred delegates from all parts of the Philippines attended. For more than a year the Quezon politicians have been working openly and secretly to bring about the downfall of Aguinaldo from his influential position. When the convention had assembled Gen. Aguinaldo rose. He took his former comrades into his confidence, revealing the manner of the fight against him and the reasons why he had no bitterness against the United States.
"I am in the fight against Quezon to the finish and never will I rest until he is driven from power," he said.
When he had sat down the whole convention, which before had been in almost breathless silence, now and gave him a thunderous ovation. All the delegates went on record as favoring the Aguinaldo policy of cooperation with Gen. Dan Leonard Wood and the American people. Speakers in all parts of the hall rose and bitterly denounced the operations of the Quezon faction.
A letter from Gen. Wood to Gen. Aguinaldo was read. Gen. Wood expressed regret because he was unable to visit the convention. "Gen. Aguinaldo," Gen. Wood's letter said, "holds the confidence and esteem of the American people to a degree never enjoyed before by any other Filipino."
This was the occasion for another outburst of applause which continued for several minutes.
Speakers in the hall referred to the part played by Gen. Quezon in the Philippine revolution. He was a major and played a minor part.

WOMAN SWIMS CHANNEL IN TWENTY-HOUR BATTLE
Son Cries Encouragement as She Fights Adverse Tide and Fog in Catalina Strait
Mrs. Martha F. Huddleston, who four months ago could not swim a stroke, yesterday conquered the Catalina Channel in twenty hours and forty-two minutes following one of the most dramatic struggles in the history of distance swimming. The 30-year-old Long Beach woman, first of her sex to swim the wide strait, stepped out on the rocky cliffs of Point Vicente at 11:14 a.m. yesterday, following a thirty-mile struggle against intensely cold water, adverse tides and wind and the added discomfort of being lost for three hours.

NORTHERN AREA HAS RAINFALL
Santa Rosa Gets Inch and Dunsmuir Reports Torrents
SAN FRANCISCO, Feb. 6. (Ex-clusive)—Scattering showers fell in Northern and Central California today, varying from light drizzles to a downpour which registered more than an inch at Santa Rosa. The outlook for tomorrow is for a heavy rain, but the weather service says it is for fair weather tomorrow and Tuesday.
Rainfall data up to 8 p.m. today:
Santa Rosa 1.1
Dunsmuir 2.5
Sacramento 1.2
Stockton 1.5
Fresno 1.8
San Luis Obispo 1.3
Tombstone and Deep Snow Farther North
YREKA, Feb. 6. (P.)—Yreka county was swept today by a storm that approached a blizzard in intensity. Wind and rain fell in a deluge of snow. The territory between Dunsmuir and Redding reported record snow.

SENATOR'S CONDITION IMPROVES
Jones of New Mexico on Way to Recovery After Collapse Saturday
WASHINGTON, Feb. 6. (P.)—Senator Andrew A. Jones of New Mexico, who suffered a heart attack yesterday at the Capitol, was reported "very much improved" tonight at the Emergency Hospital.
Encouraged by steady improvement in the Senator's condition throughout Sunday, physicians ventured the statement that the patient might be removed to his home tomorrow.
At 8 p.m. today hospital attaches reported that Senator Jones had rested comfortably through most of the day, gradually regaining strength and suffering from no further complications. His temperature, pulse and respiration were normal.
Near-Admiral Cary T. Grayson, attending physician, said the Senator had severely taxed the Senator's reserve strength, and that he probably would not be able to resume the full burden of his duties in the present session.

PORTUGAL REBELS IN OFFER
Bombardment of Oporto Delayed as Overtures Come From Insurgents
LISBON, Feb. 6. (P.)—The insurgents at Oporto are sending emissaries to negotiate their surrender. This announcement was made today by the Minister of War who is in the troubled region directing the loyal forces. In view of this action the Minister says he has postponed the intended bombardment of the rebel position. He will impose unconditional surrender, he declares.
The War Minister reports that after preparations were made to dislodge insurgents at Oporto he gave the order to suspend the bombardment. He is now in the city, he says, in order to avoid damaging buildings and hospitals, which were full of wounded.
On receiving this ultimatum the insurgents sent emissaries to arrange for their surrender. The emissaries were received by the Minister of War. The emissaries were received by the Minister of War. The emissaries were received by the Minister of War.

DETROITERS IN STRAITS FOR WATER
Relief Pumps Inadequate in Local Plant's Failure; Situation Serious
DETROIT, Feb. 6. (P.)—After a twenty-four-hour water shortage which approached serious proportions, local officials tonight were forced to abandon an attempt to repair the Detroit water plant.
During the interval a temporary situation and pumping plant was installed on Detroit River which it was thought would provide an adequate supply for the city. The pumps, however, produced only about one-tenth of the normal supply. Persons living on upper floors of apartment-houses and business places were without water.
Mineral water concerns did a land-office business while cafes and other establishments were unable to provide water for patrons.
After receiving thousands of complaints city officials ordered abandonment of the repair work. A temporary plant will be erected at a cost of \$500,000 to provide the city with water supply before repair work is again attempted on the old plant.

ROCKWELL AIR FIELD REVIVES

Army Will Partly Restore San Diego Base

Skilled Mechanics to Be Added to Force

Texas Attack Group May Come to Island

SAN DIEGO, Feb. 6. (Exclusive)—Official advice that the War Department plans to increase the force of skilled aircraft mechanics now employed at Rockwell Field and partly to restore this famous flying field to its post-war status, were received from Washington today. In accordance with the five-year construction and training program of the Army Air Corps as approved by Congress, March 1922, at Riverside, it is to be re-established as a primary flight-training school for cadets.

All the planes that will be used at the Riverside military flying school are to be disbanded and repaired at Rockwell Field. According to Capt. J. H. Houghton, setting commander of Rockwell Field, this will mean that the mechanical force of the local flying post will have to be greatly increased.

Efforts to bring the third attack group from Calverton, N.Y., to San Diego for permanent station at Rockwell Field are still being made by Air Corps authorities. Reports from Calverton are to the effect that the officers of the attack group are far from satisfied at the facilities afforded at the Texas base and have strongly recommended moving this unit to San Diego.

Although the Navy has made every effort to acquire the Army's western section of North Island, it is known that the War Department has no intention of abandoning this property to the Bureau of Aeronautics.

The Navy desires Rockwell Field for the ultimate expansion of its ships, hangars and barracks. Army Air Corps authorities, however, declare that Rockwell Field is a vital part of the Air Corps and that instead of abandoning it the post will be enlarged to meet the expanding needs of the Army's air fleet.

MAY MANUFACTURING BRICK

AUSTIN (Tex.) Feb. 6. (Exclusive)—A bill which has been introduced in the Legislature by Representative Thomas Burns of Houston, is passed finally, the State of Texas will go into the business of manufacturing cement, vitrified brick, crushed rock and other road materials on a large scale.

INFLUENZA LAID TO SUN'S SPOTS

Scientist Traces Epidemics to Solar Agitation

History Declared Supporter of Latest Theory

Moscow Professor Author of New War Forecast

MOSCOW, Feb. 6. (AP)—Sun spots are responsible for the present epidemic of influenza, in the opinion of Prof. A. I. Tchikovsky of Moscow University. He is the scientist who in a paper sent to the recent convention of the American Association for the Advancement of Science in Philadelphia, predicted another great war in 1929, due to solar agitation.

He told the correspondents that the combined electrical influence of the sun on the earth had increased bacterial activity to the point where whole countries are affected by disease.

Most poisonous bacteria are harmless for humans, the professor explained, provided they are not acted on by the sun. He believes that, by isolating the human organism from solar influence and submitting it to special electrical treatment, a quick and effective cure for influenza will be found. He also attributes typhoid fever, hydrophobia and the bubonic plague to sun-spot activity.

"Man," he said, "is the slave of the sun and its vast electrical power. Alike in health and sickness, his welfare and behavior are not regulated by providence or the unstable human will, but by the sun's electro-magnetic force upon the earth, which is one common organism of which man is only a part."

His theory, that the present spread of influenza throughout the world is due to the sun spot, is brilliantly supported by the history of epidemics for the last 1000 years.

"For example, the greatest cholera plagues occurred during the periods of maximum sun-spot activity and declined sharply when that activity reached its maximum. These sun-spot periods occur regularly, in cycles of eleven years."

Prof. Tchikovsky's paper to the meteorological section of the Association for Advancement of Science during its meeting in Philadelphia in December said all great wars had followed periods of intense sun-spot activity, and continued:

"In 1207 and 1208, when the eleven-year period of sun-spot activity attains its maximum and when this maximum will coincide with the maximum of two other periods of sixty years and thirty-five years, there will be a great human activity of the highest historical importance, which may again change the political chart of the world."

NEW JUNGLE TREK PLANNED

Abyssinian Expedition Collects 2000 Museum Specimens and Rests at Capital

BY JACK BAUM

(Copyright, 1927, in United States, Great Britain and all other countries by North American Newspaper Alliance)

ADDIS ABABA (Abyssinia) Jan. 31. (By Mail, Exclusive)—Two thousand specimens of wild life, a dependable chart of the previously unknown section through which we have traveled, a new river and a new cataract, are the first fruits of the Field Museum-North American Newspaper Alliance expedition to Abyssinia. After traveling more than 800 miles by mules and camels, our party of five Americans has returned to this city to prepare for a second journey into Abyssinian wilderness.

The new river was christened De-Simian, after Ibsen. We will not return via River and the cataract, Stanley to Addis Ababa but will come out through the Sudan, down the Nile, sometime in May.

Has Tafari, ruler of Abyssinia, was keenly interested in the results of our trip. He sent for the expedition members immediately after our return and was extremely friendly and complimentary through an informal reception of two hours which followed.

Within a week our party sets out again, this time for the heights of snow.

COAL OUTPUT LARGE TWO CHURCHES BURN

AS ALTAR LAMP FALLS

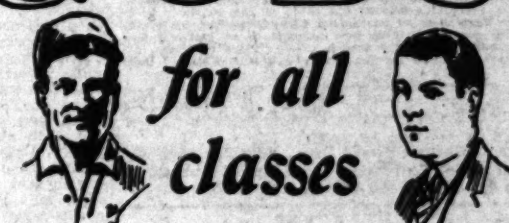

WASHINGTON, Feb. 6. (AP)—Coal produced in the United States during 1926 amounted to 669,500,000 tons, the Bureau of Mines estimated today, revealing that the total was exceeded only in 1918, when war demand was at its peak and the output was 778,211,000 tons. Of the 1926 production, 278,500,000 tons was bituminous and 391,000,000 anthracite.

Despite the high rate of production, deaths from mine accidents dropped off slightly in 1926.

WATSONVILLE, Feb. 6. (AP)—Two churches and two buildings connected with St. Francis School for Boys, three miles east of here, were destroyed early today by a \$80,000 fire. Firemen attributed the blaze to a church altar lamp which fell from its hangings.

The buildings destroyed were the historic old Valley Church and the new church adjoining it, the three-story dormitory at the school and the school laundry. Firemen prevented spread of the flames to the main school building.

DIVIDENDS WITHOUT INVESTMENT

in Philadelphia

Mrs. B—lives on Catharine St., Philadelphia. In addition to light fixtures, she uses an: Electric Washer, Cleaner, Percolator, Curling Iron, Iron, Vibrator and Battery charger.

A recent bill covering two months for this service was \$7.36.

but—in Los Angeles

at Bureau domestic rates this same bill for the same amount of electricity would be \$6.04, a saving of \$1.32. Philadelphia domestic rates are 22% higher than in Los Angeles.

The savings offered to Los Angeles consumers of Bureau power and light, compared with average rates throughout the country, run into millions. These savings are the direct result of a policy which, coupled with sound financial management, permits rates to be lower than in any city of competitive size in the United States. The Bureau is operated for the special benefit of Los Angeles citizens.

Every Los Angeles citizen is a "shareholder" in this prosperous business. Just as it is the purpose to make rates low, so shall Bureau light and power always be adequate and reliable. These benefits extend not only to domestic users, but to the building up of an industrial Los Angeles in which all share.

BUREAU of POWER and LIGHT

Operating the Electric Light and Power System for THE CITY OF LOS ANGELES

GERMANS LOYAL TO GOVERNMENT

Stresemann Says Restoration of Monarchy Impossible

Issue of Republic's Stability Seldom Raised

Foreign Minister Criticizes American Japs

BY J. B. SHARKEY

BERLIN, Feb. 6. (P)—Dr. Gustave Stresemann, Germany's Foreign Minister, believes the German republic is now consolidated.

"The question, 'republic or monarchy?' hardly plays a part in our internal politics," he said, in an ex-

clusive Associated Press interview. "Foreigners who think that an even-
tual return of the Kaiser would pro-
duce in Germany a movement for a
restoration of a monarchy are mis-
taken. The events of the last few
years have made that impossible."

Dr. Stresemann talked rapidly in
excellent English, which he studied
with a tutor, when he wanted to
throw his hands into the air like a
one-termed president in despair, and
keep at it until it did come.

He explained how when the new
German republic was born there came a time
of fear and excitement, and a time
of people who had made such a re-
volutionary effort during the war, and
who wanted to hold together for their
new form of government.

He continued: "All this has passed.
Today there is a man at the head of
the republic who is the paladin of the
new Germany and is making himself
Hindenburg—whose example in plac-
ing himself at the head of the new
Germany and making himself a sym-
bol between the old and the new has
won over millions in the German
republic."

"The struggle over the form of the

German state is terminated and only
misunderstandings abroad or exagger-
ated conservatism in Germany, which
have really no decisive significance,
can lead to any confusion."

All Germans proverbially love
music, and it was when Dr. Stresemann
referred his views on that subject that
he was suddenly interrupted by the
detonation of a gun.

"I can not understand," he said,
"how great America, one of the great
powers, can have before modern times
which express neither harmony or
balance nor grace of body. In Johann
Bach's 'Gloria' of 'Benedictus' I find
more music than in all the
modern German music."

The road from Munich to modern music
is not an ascent but a descent."

Young Durr was a good student
and was popular with the student
body. He studied voice at the
Bach school of music and also was a
skilled pianist.

ROCHESTER (N. Y.) Feb. 6. (P)—
J. Morgan Durr, Jr., 30 years of age,
of this city, a sophomore at Uni-
versity of Rochester and student at
Bach School of Music, committed
suicide here today by shooting him-
self through the head with a .38
caliber rifle. Durr was a classmate,
classmate brother and classmate of
Willy Wile, 16, who killed himself in
exactly the same manner at his home
in York on January 3 while on
his Christmas vacation.

Unlike Wile, however, who found
his "little and barren" illness was
given to the cause of young Durr's
action. He had had pneumonia four
times and was said to be in a ter-
rible condition. The similarity of
the methods indicated, however, that
he had brooded over the death of his
classmate.

versity of Rochester and student at
Bach School of Music, committed
suicide here today by shooting him-
self through the head with a .38
caliber rifle. Durr was a classmate,
classmate brother and classmate of
Willy Wile, 16, who killed himself in
exactly the same manner at his home
in York on January 3 while on
his Christmas vacation.

Unlike Wile, however, who found
his "little and barren" illness was
given to the cause of young Durr's
action. He had had pneumonia four
times and was said to be in a ter-
rible condition. The similarity of
the methods indicated, however, that
he had brooded over the death of his
classmate.

Young Durr was a good student
and was popular with the student
body. He studied voice at the
Bach school of music and also was a
skilled pianist.

ROCHESTER (N. Y.) Feb. 6. (P)—
J. Morgan Durr, Jr., 30 years of age,
of this city, a sophomore at Uni-
versity of Rochester and student at
Bach School of Music, committed
suicide here today by shooting him-
self through the head with a .38
caliber rifle. Durr was a classmate,

GUARDSMAN MAY TRY FOR FLIGHT AWARD

ST. LOUIS, Feb. 6. (P)—A St. Louis-
to-Paris airplane flight for the \$25,
000 Orteig prize is under contempla-
tion by Capt. Charles A. Lindbergh,
chief pilot of the St. Louis-Chicago
air-mail route and a flight comman-
der in the One Hundred and Tenth
Observation Squadron, Missouri. Na-
tional Guard, it was learned today.

TEXAS HAS STATE BIRD
AUSTIN (Tex.) Feb. 6. (Exclusive)—
The House has adopted a Senate con-
current resolution naming the mock-
ingbird as the State bird of Texas.

MOTOR TRUCKS FROM THIS COUNTRY ARE
becoming popular in Mexico.

PORTLAND (Or.) Feb. 6. (Exclu-
sive)—Thirty-five per cent of all
man-caused forest fires in national
forests of Oregon and Washington
during 1926 were caused by careless
smokers, according to a report just
compiled in the district forester's of-
fice here. Two hundred and eighty-
one out of the 300 fires resulted from
cigarettes, cigars and pipe tobacco.
Campers were close behind with 284.

SMOKERS TO BLAME FOR FOREST BLAZES

HUSBAND KILLS MAN IN FIGHT OVER WIFE

MOUNT VERNON (Wash.) Feb. 6. (Ex-
clusive)—A P. Anderson, 72 years of
age, a barber, was shot and beaten
to death near here last night by
Charles Ewing, 44, a plumber, dur-
ing a fight over Ewing's wife. Ewing,
with his wife, who was a witness
to the killing, are held in County
Jail here. The former freely ad-
mitted the slaying, the officers said.

Production of petroleum along the
short on Lake Maracaibo, Venezuela,
is increasing.

ALASKAN JOURNEYS TO TEXAS TO CLAIM BRIDE

SAN ANTONIO (Tex.) Feb. 6. (Ex-
clusive)—A. F. Anderson, 72 years of
age, an Alaskan prospector, was married
in a Baxter county justice court to
Mrs. Cecilia Welch of San Antonio.
Anderson said he came all the way
from Canada to claim his bride, and
now intends to return to Alaska,
where he has spent most of his life,
and resume prospecting operations.

Switzerland sent fully 1,800,000
less wrist watches to other countries
in the past twelve months than it did
in the year before.

STOCKTON TRADE BODY TELLS CORRECT TIME

STOCKTON, Feb. 6. (Exclusive)—
An average of 119 inquiries a day are
being answered by the time-keeper
bureau of the Stockton Chamber of
Commerce. The service went into ef-
fect several months ago when the
Western Union and police depart-
ment discontinued giving out the
time to persons telephoning in and
asking "What time is it?" As a re-
sult of the inauguration of the
service here several other chambers
of commerce have adopted the plan.

SALEM (Or.) Feb. 6. (Exclusive)—
A bill designed to stop the shipping
of Oregon shrubbery and flowers out
of the State has been introduced into
the State Legislature. A file of \$500
would be imposed on any violator of
the law. It goes so far as to pre-
hibit digging of plant roots or bulbs
on public or private lands without
permission. In support of the bill it
was declared that one company had
shipped 80,000 wild flower bulbs out
of the State last year.

WILSON (Cal.) Feb. 6. (Exclusive)—
A bill designed to stop the shipping
of California shrubbery and flowers out
of the State has been introduced into
the State Legislature. A file of \$500
would be imposed on any violator of
the law. It goes so far as to pre-
hibit digging of plant roots or bulbs
on public or private lands without
permission. In support of the bill it
was declared that one company had

Following Field Museum Expedition Through Wilds of Abyssinia

EAGLES that measure eight feet from wingtip to wingtip, dainty deer that walk on the tips of their toes, and rare nyala or Queen of Sheba's antelope, and quail three times the size of the quail common to this country are the many specimens of bird and animal life already collected by the Field Museum of Natural History expedition to Abyssinia. The party is now pressing farther into the wild interior of the little known country to secure rare specimens of wild life. The photos on this page, presented to Southland readers exclusively through the "Times" and the North American Newspaper Alliance, are the first showing the party actually in the field.

Head of the nyala, the famed Queen of Sheba's antelope, of which only two specimens in the world have specimens, was almost the first prize of the expedition. Note the beautiful, lyre shaped horns.

A camp on the inner edge of the wild Abyssinian mountain country. This is lion country and the habitat of the great lammergeyer, the savage Abyssinian eagle, which is probably the most powerful bird living.

Head of a red wolf, found nowhere but in Abyssinia, shot by Dr. Osgood at an altitude of more than 11,000 feet. He is fleet and an expert forager.

Jack Baum, "Times" correspondent, equally expert with the rifle or typewriter, and native member of expedition in field. It was Baum who bagged the first nyala secured by the party.

Dr. Wilfred Osgood and his native attendant reconnoiter from a high point on Mt. Albasso. The Galla gun-bearer wears the Mohammedan turban.

The dainty chipspringer, a small Abyssinian member of the deer family, which walks on tiptoe much in the same fashion as a ballet dancer.

Seydam Cutting of New York, athlete and cameraman, is the official cameraman with the expedition. He is caught photographing Galla herds.

The Abyssinian party's camp on a slope of Mt. Albasso, about 12,000 feet level. Open country of this character abounds in wild life and many of the specimens were obtained near this camp.

The nyala's head and hide go to science, but his steaks go to the appetites of the party. Photo shows flesh of the antelope drying on lines near the camp. The Galla is a great eater.

River Warfare.

by J. CARROLL MANSFIELD

AFTER DRAGGING AND CAPTURING THE UNION S.S. "QUEEN OF THE WEST" ON THE RED RIVER IN FEBRUARY, 1862, THE CONFEDERATES PUT THE VESSEL IN COMMISSION AGAIN AND ADDED HER TO THEIR RIVER DEFENSE FLEET.

IN THE MEANTIME, ADMIRAL PORTER HAD SENT LIEUT. COMMANDER BROWN WITH THE GUNBOAT "INDIANOLA" DOWN THE MISSISSIPPI TO JOHN ELLET. NEAR THE MOUTH OF THE RED RIVER, BROWN MET THE YOUTHFUL COLONEL, RETURNING FROM HIS ILL-FATED EXPEDITION, AND LEARNED OF THE LOSS OF THE "QUEEN".

SEVERAL DAYS LATER, BROWN STARTED UP THE RIVER TOWARD Vicksburg TO RETURN TO THE FLEET. ON THE WAY, THE "INDIANOLA" WAS PURSUED AND ATTACKED AT NIGHT BY FOUR CONFEDERATE STEAMERS, ONE OF THEM BEING THE "QUEEN".

AFTER A FIERCE BATTLE, IN WHICH THE "INDIANOLA" WAS DAMAGED, BROWN AND HER CREW WERE FORCED TO SURRENDER. THE CONFEDERATE COMMANDER FORCED THE UNION STEAMSHIP TO BE BURNED AT VICKSBURG, MISSISSIPPI.

TED SIMPSON RACE WINNER

Los Angeles Speed Demon
Cops 100-Mile Chase
on Fresno Track

FRESNO, Feb. 6. (P)—Ted Simpson of Los Angeles driving a nonstop race, won the 100-mile event staged here this afternoon in 1h. 44m. 18s. His average speed was 77.2 miles per hour. Simpson's special was the only car to finish and he carried off the \$1000 first prize. Fred Cooper, Los Angeles, was second in 1h. 45m. 18s. Bobbie, Iowa City, Iowa, took third, completing 128 laps and Mel Knealy was fourth after turning ninety-nine laps.

WINFIELD IS VICTOR AT ASCOT

Two Drivers Cheat Death in Bad Smash; Day Filled With Spills, Thrills

Ed Winfield survived a 160-lap grid, filled with spills, thrills, mishaps and accidents, to gain first honors and money in the 100-mile Fox Western dirt track auto racing championship staged at the Ascot Park track yesterday afternoon. He navigated the distance in 1:25:14.4, nursing a sputtering, spitting car over the finish line a couple of laps ahead of his nearest rival. Winfield drove a special car of his own make. Otto Lind, youthful pilot, nearly to ascend honors ahead of Speed Winfield. Fred Lyons, a Chevrolet special, Francis Quinn in a Buick special, and Bill Nelson in a Ford special finished in the order named. The feature event was marked by a crash, a spill, two fires and a lack of race accidents that kept the largest crowd in recent years—the largest, in fact, since Promoters Matheson and Lutz took charge—in a continual uproar. Fortunately none were serious.

P. R. Barrett and Chet Casey, driving Buick, locked wheels on the southeast turn only in the race, after Barrett had sprinted to the lead and

MACK FAILS TO LAND TY COBB FOR ATHLETICS; STILL HOPING

PHILADELPHIA, Feb. 6. (P)—Connie Mack, manager of the Philadelphia Athletics, returned today from Augusta, Ga., without the signature of Tyus Raymond Cobb, former manager of the Detroit Americans, to an Athletics contract. Mack said, however, the negotiations were not closed. Cobb returned north with the Athletics manager, with Dan Howley, manager of the St. Louis Browns, Cobb went on through to New York.

"Cobb is taking his time about making a decision," said Mack. "He does not want to commit himself until he has taken everything into consideration."

DEL MONTE POLO STARS WIN TILT

Defeat Hitchcock's Monterey Riders, 11 to 8

Harry East Plays Great Game for Winning Four

Tommy Shows Up Well, But is Poorly Supported

East was best yesterday. In this tilt it was little Harry East, the tiny polo star, who led the Del Monte team, a star English player, to a four-goal victory over the three English players and one American player, the Del Monte Country Club in one of the most exciting games played on the Coast in years.

The tilt also was a 4 to 4 tie in the seventh Chukker, when Commander P. E. Wise of the Del Monte team, a star English player, was thrown from his pony in front of the grandstand causing him to land on his head. Wise was knocked unconscious for over five minutes.

The accident happened during one of the most exciting moments of the game, when both teams were trying to score after the ball. The English player's horse tripped on the sideboard and only Wise's expert horsemanship saved him from having his neck broken. Although very shaky he played out the game. Yesterday's game was really a tilt between great players from the United States due to the fact that three of England's greatest stars, Harry East, Commander Wise and Tommy McCree played on the Del Monte team and opposed Hitchcock's squad of American players. The greatest crowd of fans that has ever witnessed the sport on this Coast turned out for the game.

Royalty, blue bloods, film celebrities by the score and just plain folks were among the 15,000 that crowded into the field yesterday, overlooking the grand stands and into the press box.

They saw him, but Harry East stole most all of Tommy's thunder. Harry, riding on steeds that acted as though they had wings, was here and there everywhere. He scored eight goals out of the eleven for the Del Monte team. Hitchcock gave the fans enough thrills with his playing, however, to justify saying that he has been up and about him. He was badly handicapped by having a very weak crew of team-mates yesterday. Instead of being able to play his usual great offensive game up forward, he was forced to play a defensive game in order to save his team from being smothered by the fast English riders. Tommy was really the whole Monterey team.

Tommy and Moore of the Monterey team played a very poor game of polo. Time after time Tommy was up where Hitchcock should have played and would have if it did not leave the goal line almost unprotected. Hitchcock was forced to make most of his shots while being badly rowded by the three fast Englishmen. Tommy made three goals and was really responsible for the others that his side gathered. Wise and McCree gave East the best support he has had in years and that tiny individual just rode his head off taking advantage of it. That in a nutshell is the story of the game. Hitchcock will not play again in Southern California until after the international matches.

The line-up:

Del Monte (11): East (3), Wise (3), McCree (3), East (3), Wise (3), McCree (3), East (3), Wise (3), McCree (3), East (3), Wise (3).

BUNNY RYAN LOSSES ABROAD

Santa Monica Star Beaten in Cannes Doubles, but Wins Tennis Singles

WICK, Feb. 6.—Elizabeth Ryan, said to be America's best woman player now in France, suffered her first defeat today in the Cannes tournament at Cannes, partnered with Louis Worms, the Danish ace, in the finale of the mixed doubles. The beating was administered by the young English star, Ellen Bennett and Henri Cochet. Miss Ryan played a bad game, serving many double faults. The score was 6-4, 6-7. Miss Ryan, however, won the singles finale, beating Miss Bennett, 6-4, 6-4, 6-3, in a fine exhibition.

POTRERO FIELD UNIQUE IN OIL

Activity Before Completion
of Well Unusual

Absence of Showings Fails to
Curb Operations

Standard Only Large Concern
Without Holdings

With half a dozen derricks built or in course of construction, and more than a dozen locations spotted, the Potrero district, south and east of Inglewood, continues to be something of a phenomenon among oil fields. Never before have so many operations become so active in any California field prior to the actual completion of a well. This condition has existed for the last three weeks.

The Julian Petroleum Corporation's Cypress No. 1, which, in view of the inactivity of the Associated Oil Company in its Cypress No. 1, has been regarded as the well to prove the field beyond any question of a doubt, continues to drill ahead without apparent showings, although it has long since passed the depth at which the Associated's showings occurred. But this lack of showings does not seem to discourage anyone, and least of all the Julian management which has ten other locations spotted in the district.

An interesting feature of the situation at Potrero is the fact that the Standard Oil Company, which has drilled several test wells in that area, has no holdings there, now that there seems to be a good chance of developing a field. At one time Standard held several hundred acres in the Potrero and Hyde Park district, but eventually relinquished it. The Potrero property, which the Standard drilled its last well in, is now owned chiefly by the Associated Oil Company, which has drilled a dry hole on it, but is retaining it, pending the outcome of successful operations.

A list of the principally interested oil companies at Potrero includes those of the large operators, and a good many of the small ones. The Associated Oil Company, and the Julian Petroleum Corporation, probably hold the largest acreage, but other leaseholders are the Union Oil Company, General Petroleum Corporation, California Petroleum, Richmond Oil Company, Superior Oil Company, Crescent Petroleum Company, First Petroleum Company, Wilshire Oil Company, General Petroleum Corporation, Joseph R. Dabney, George P. Getty, Fred Getty, and others.

URICH OIL ACQUIRES TRACT AT BELRIDGE

BAKERSFIELD, Feb. 6. (Exclusive) The Ulrich Oil Company, headed by John Ulrich, has acquired the title to 180 acres on Sec. 20, 21-22, east of Belridge, and, according to reports, is planning to make a test for oil within a short time. The land was sold in two eighty-acre tracts by W. L. Britt and Ellen E. Britt.

AVERAGE ON OIL EXPORTS MAINTAINED

Slightly Lighter Shipments
of Last Week Fail to
Lower Standard Figures

Although bulk-petroleum exports from Los Angeles Harbor last week were 502,000 barrels higher than the previous week's shipments, they totaled 1,975,914 barrels and made twenty-eight tanker loads, and the average for the two weeks was well over 3,000,000 barrels per week. Last week's shipments totaled 545,888 barrels, of which 184,000 barrels were bulk consisting of that commodity.

The Pacific domestic trade took 724,000 barrels, including 318,000 barrels of crude, 266,000 barrels of fuel and 140,000 barrels of gas. The Pacific foreign trade took 244,500 barrels, of which 184,000 barrels were fuel and 50,000 barrels were kerosene.

The Atlantic domestic trade took 340,000 barrels, of which 244,000 barrels were fuel and 96,000 barrels were gas. The Atlantic foreign trade took 283,500 barrels, 114,000 barrels being crude and 169,500 barrels being fuel. The shipments were as follows:

PACIFIC DOMESTIC
Brisson to Portland with 21,000 barrels of fuel for Standard Oil Company.
A. and C. to San Diego with 22,000 barrels of fuel for Standard Oil Company.
J. C. to San Francisco with 19,000 barrels of fuel for Standard Oil Company.
K. to San Francisco with 18,000 barrels of fuel for Standard Oil Company.
L. to San Francisco with 17,000 barrels of fuel for Standard Oil Company.
M. to San Francisco with 16,000 barrels of fuel for Standard Oil Company.
N. to San Francisco with 15,000 barrels of fuel for Standard Oil Company.
O. to San Francisco with 14,000 barrels of fuel for Standard Oil Company.
P. to San Francisco with 13,000 barrels of fuel for Standard Oil Company.
Q. to San Francisco with 12,000 barrels of fuel for Standard Oil Company.
R. to San Francisco with 11,000 barrels of fuel for Standard Oil Company.
S. to San Francisco with 10,000 barrels of fuel for Standard Oil Company.

'NO MAN'S LAND' OIL STRUCK
STRAITFORD, (Tex.) Feb. 6. (Exclusive)—No railroad runs nearer than forty miles to the prospective new oil field in Cimarron county, Okla., where W. E. Ramsey and W. E. Ramsey of Oklahoma City brought in a well the other day at a depth of 4195 feet. Texhoma, situated on the Texas-Oklahoma line, a little station on the Chicago, Rock Island and Pacific Railroad, is perhaps the shipping point nearest to the scene of the new oil strike, with Stratford, situated on the same railroad, a close second, in matter of distance.

It is interesting to note that until a few years ago the little stretch of territory formed by the single line of counties belonging to Oklahoma extending to the Red River line, with Colorado bordering them on the north, and including Cimarron county, were marked in geographers as "No Man's Land." The country was regarded as being so worthless that none of the adjoining States were willing to claim it. It was a part of Texas once, but was annexed in that area which was sold to the United States government at the time it was admitted to the Union. Even the United States did not claim jurisdiction over "No Man's Land," and it became the rendezvous of many desperate outlaws who preyed upon the ranchmen and other early settlers of corners of Kansas, New Mexico, Colorado, Texas and Indian Territory during the 1870s and well into the 1890s. Texas rangers finally made it so hot for the murderers, train robbers and bad men generally who were congregated in the land which had no law that it was cleared of all its inhabitants and was again known as a desert waste. It was taken over by Oklahoma when that State was created, the Rock Island built a line through there, settlers began to come in, county governments were formed, and it became a flourishing, prosperous farming region.

In oil circles the greatest significance is attached to the discovery of oil in Cimarron county at a point on the Cimarron River, ten miles north of Boise City. It may mean the opening of an entirely new oil structure, as the scene of the strike is more than 100 miles from the nearest production in the Panhandle of Texas, and probably 200 miles from the nearest field in Oklahoma. It is asserted.

The discovery well is curiously situated. It is within three miles of the Colorado line, twelve miles from New Mexico, twenty miles from Texas and fifteen miles from Kansas. It is situated on a block of school land embracing more than 200,000 acres, owned by the State of Oklahoma and under lease to the Ramsey Brothers who were formerly active in the development of the Signal Hill field near Los Angeles, Cal.

GAS ZONE IS THREATENING TWO PROJECTS IN LIMELIGHT

Interest of Operators About
Equally Divided

Standard Pacific Electric in
Proven Territory

San Martinez Test Regarded
as Most Important

With the Standard Oil Company
bringing in a 2,000-barrel well in the
western part of Huntington Beach,
and the San Martinez Oil Company's
test well on the east side of the field
getting to a depth where important
disclosures may be expected, the in-
terest of operators in that field is al-
most equally divided between the
two areas.

Regardless of developments either to the west or east, it is quite generally admitted that the Huntington Beach city field has reached its peak. New completions, with the exception of the wells of the Standard, west of the town-let area, are not as prolific as they were a few weeks ago, and several are declining rapidly, and several of them are developing water troubles.

Production means, figuring thickness of oil zones, degree of saturation, and number of wells, have estimated that the average life of a flowing well in the city field should be about sixteen weeks. After that the average well will go on the pump, and its production will be the Standard's fine producer on the Pacific Electric, because the success more or less steady for an indefinite period, according to these estimates.

So far, the walking-beam is the exception at Huntington Beach, but the general opinion is that they will begin to appear in the near future.

While no actual showings have been found in the San Martinez well, the formations penetrated are said to correlate favorably with the formations in the proven area, and several geological experts have committed themselves to the opinion that the well is likely to prove a new producing area. This is anticipated by lease agents who have rounded up most of the lots in that part of Huntington Beach.

LULING OIL HUNT WILL BE RENEWED

Field Notable as Only
Producer from Edwards
Lime Again to Fore

SAN ANTONIO, (Tex.) Feb. 6. (Exclusive)—The Edwards fault, northeast and southwest from the Luling fault in Caldwell and Guadalupe counties, is to be drilled all over again during 1927.

The Luling field made history in that it is the only field in America which has produced from the Edwards line. Some prominent geologists advised against drilling there and when oil was found in the Edwards line they said it didn't belong there and wouldn't last.

It is still producing about 10,000 barrels a day and last June the north and south property in the field was sold to the Magnolia Oil Company for \$115,000, half cash and half oil.

Finally convinced of the importance of the Edwards fault, the company decided to find another such pool and millions of dollars were spent without finding it. Following a breaking report in which geologists figured out some new theories, the campaigning started again.

Major companies are not going to do much of the drilling themselves, but they will send small operators to try to locate the field.

Several wildcat wells have already started on the edge of the present field and others have been made for several others.

Associated Gas and Electric System

Founded in 1923

Public Service in 1,000 Communities

One of the outstanding features of the Associated
System is that its properties serve a wide variety of
communities and enterprises. This diversity adds
materially to the stability of earnings.

The Associated properties are located in 14 states.
They serve 420,000 customers in 1,000 old and well
established communities with 2,800,000 population.

Wide Diversity of Earnings

The communities served include agricultural,
manufacturing, mining and residential areas, which
means wide diversity. No one industry or business
predominates. Prosperous conditions in one area
offset less favorable conditions elsewhere.

Over 37,000 persons, of whom a majority are cus-
tomers, have invested in the securities of the Associ-
ated System.

MALJAMAR OIL BOOSTS OUTPUT

New Mexico State Lease Well
150-Barrel Producer

Prairie Gets Good Showing
in Keel Permit Project

Shelly Test Capped Pending
Adjustment of Title

ARTERIA (N. M.) Feb. 6. (Exclu-
sive)—The Maljamar Oil and Gas
Corporation's State lease No. 1 well
on Sec. 16, 17-32, is making 150 bar-
rels daily, while being cleaned out.
It will probably be drilled a few feet
deeper, present depth being 4115
feet. The lower sand of the discovery
well, which it offsets on the north,
has not been drilled into.

The Maljamar No. 1 on the Grace
Mitchell permit, Sec. 5, 17-32, is
swabbing 115 barrels daily with bot-
tom of hole at 3910 feet. The deep
sand is expected in this well at
4000 feet. A 1/2 in. test is being cre-
ated on a fourth test to be on the Beards-
ley permit, Sec. 15, 17-32, drilling to
start this week.

The Prairie Oil and Gas Company
has drilled into a good showing of
oil and gas in its initial test on the
Keel permit, Sec. 10, 17-31. This
well is one mile north of the Shelly
Oil Company's No. 1, which has been
capped for six months.

With the log of the Prairie run-
ning slightly higher than that of the
Shelly, a sandy lime was picked up
between 3277 and 3290 feet. This
correlates with the Shelly showing.

The majority of the gas is coming
from 3290 feet and the oil sand is
looked for at about 3250 feet.

The Shelly well, drilled in only a
few feet, appeared to be the best
producer in the field, but the en-
courage was short lived, as it was
capped on the second day, pending
adjustment of title and other dif-
ficulties.

The Texas Company is rigging up
for a test north of the Prairie well.
This will be the No. 1 on the John-
son permit, Sec. 24, 16-31. The com-
pany is making a location on Sec. 4,
19-35, in the Hendon, Dexter &
Blair block. It is the intention of
the Texas outfit to drill a well close
to the Texas line in the southeastern
corner of New Mexico, about fifteen
miles north of the Westbrooks well
in Winkler county.

Woodley & Jones have encountered
additional gas in their Mid-Con-
tinent Oil Company No. 1 well on the
McIntyre permit in the center of
Sec. 21, 17-30, at a depth of 3060
feet.

In order to supplement his income
as a clergyman so that he may pro-
vide necessities for his family, Rev.
C. G. Langdon, vicar of St. Matthew's
Church, London, has opened a shop
where he is making gold and silver
jewelry.

Suspect in Police Slaying Arrested in San Diego

BENNETT DEATH CLEW RUN DOWN

Prisoner Will Be Returned to Face Witnesses

Jailer Dewar States Man Answers Description

Bay City Police Give Help in Solving Murder

Lawrence J. Maloney was arrested yesterday in San Diego as a suspect in connection with the murder of Traffic Officer Percy L. Bennett, who was shot to death by a hand of a downtown store. County Jailer Dewar has gone to San Diego to return Maloney to Los Angeles to face witnesses to the killing of Bennett. The shooting occurred on January 24, but for Los Angeles officers.

The arrest of Maloney as a suspect in the case was brought about by an investigation of two weeks participated in by members of Sheriff Trapper's staff with Chief of Police O'Brien of San Francisco co-operating. Dewar, who has had charge of the investigation, was accompanied on the trip by Deputy Sheriff Peters, Vigar and Crowell. They expect to return late today.

Chief O'Brien supplied the information which led to the arrest of Maloney when he furnished to Sheriff Trapper his file on the arrested record of Maloney. The San Francisco chief made one trip to this city to give the information to the Sheriff and it was on his suggestion Dewar was granted a leave from his duties as jailer to handle the case.

Maloney was located in San Diego Saturday and was arrested by the police there for Los Angeles officers. If he is not identified by the authorities to the murder Chief O'Brien has said that he is held for San Francisco officers to be questioned in connection with two robberies there.

According to Dewar, Maloney answers the description of the bandit who killed Bennett, who was called from his station at Seventh and Los Angeles streets as a gunman held up the Brooklyn Military Company's factory at 724 South Los Angeles street. Bennett was shot down when he stepped into the doorway of the establishment. He died later from two gunshot wounds.

San Diego police declare that Maloney has been in hiding there since about the time of the shooting of Bennett. The prisoner is said to deny any connection with the crime. A prisoner recently taken from Los Angeles to San Francisco to face robbery charges furnished information to Chief O'Brien about the shooting of the traffic officer, it is said.

Dispatches from San Diego last night state that Maloney, who is 35 years of age, was being detained on robbery charges before being turned over to the San Francisco police.

CITY CLUB TO DEBATE DECENTRALIZING IDEA
A debate on the question of decentralizing the business district will be conducted in the open forum of the City Club at 7:30 p.m. tomorrow.

DANCER GIVES UP TRIP TO MEXICO

Mimi de Las Flores

Mimi de Las Flores (Miss Mimi de Flores), who for two years has been dancing her way into the hearts of the people in South America, Spain, France and Mexico, has arrived in Los Angeles to spend a few months with her parents, Mr. and Mrs. Frank De Flores at 614 Glen Holly, Hollywood.

Fearing trouble in Mexico, Mr. and Mrs. De Flores recently telegraphed their daughter to come to Los Angeles where she could be under the protection of the United States consular authorities in New York, instead of going to Mexico, as she had intended.

"This is my first glimpse of California, and needless to say, I intend to keep on glimpsing," said Miss De Flores.

While in Los Angeles the dancer will be coached in dance creations brought from many countries by Pedro Valdes, who was coach for Valdes in the production of "Blood and Sand."

KNIGHTS TO HONOR LINCOLN BIRTHDAY
An open meeting commemorating the birthday of Abraham Lincoln will be conducted by the Knights of Columbus tomorrow night at 812 South Flower street. The chief address will be made by J. P. T. O'Connor, who is a leader of the forces opposing the Non-Partisan League in North Dakota when it was shown of its power there. All friends of the Knights of Columbus are invited.

DESERT INN

PAINT SPRINGS CALIFORNIA

Sim Crabill says:

"If you're short of ideas for your Direct Advertising, our Service Staff will help you out with some good ones."

HOW can a resort hotel of moderate capacity, and that appeals only to comparatively few people, advertise profitably with a small appropriation? You have it... use Direct Advertising.

For a modest sum, an excellent folder or booklet can be produced. Other hotels will gladly print copies of this literature in their travel and resort literature racks. This valuable distribution costs nothing. Then, at little additional expense, these effective folders may be mailed to people who are logical prospects. Handled in this way, a small advertising appropriation can be made to pay handsome returns on the investment.

That we do first-class printing at fair prices is not our sole recommendation to you. We have a Service Staff that will supply you with good new ideas, design, write, and prepare your Direct Advertising in every detail. You'll be glad you came to...

ORMISTON SUIT ASSURED

Wife of Former McPherson Radio Operator Denies She Will Call Off Divorce Action

Charges upon which Mrs. Ruth Peters Ormiston will base her contemplated suit for a divorce against Kenneth G. Ormiston, once the phantom radio man of the Albee Temple McPherson conspiracy case, probably will be decided at a conference scheduled with her attorneys this morning. As soon as she confers with her legal advisers, Mrs. Ormiston said yesterday, she undoubtedly will be in a position to issue her first formal statement to the press.

The wife of the radio man, who came here from the home of her father in Sydney, Australia, for the express purpose, she said, of instituting divorce proceedings, spent the afternoon with her aunt, Miss Jessie Stephens, and friends in Riverside. She expects to return to Los Angeles today when she will register at the Wilshire, where she plans to remain until her divorce goes under way.

CONTEST UNLIKELY
It is unlikely Ormiston will contest the case unless he changes his mind. Shortly following his arrest in the East connection with the McPherson conspiracy charges, Ormiston was set for this morning in view of the fact he was out of the city when she arrived here from San Francisco Saturday morning. For this reason she was unable to make any sort of statement bearing on her case.

She asserted she will not know what Ormiston's attitude will be until after her meeting with Mr. Stephens and denied statements she had made in the past that she was going to name Mrs. McPherson or any other woman in her complaint against Ormiston. She said that she will follow the advice of her attorney in filing the suit.

BOY SCOUTS' OBSERVANCE OPENS WEEK

Troops of City, Together With Band, Gather for Sunday Church Program

Boy Scout troops of Los Angeles last night began their anniversary week celebration with a special observance program at the Westlake Methodist Episcopal Church. Representatives of the 300 troops in the city were present, including the city-wide Boy Scout Band.

The entire service was devoted to explaining the activities of the Boy Scout organization, its purposes, ideals and results. E. B. De Groot, Scout executive of the Los Angeles council, was the principal speaker. How the Scout movement grew in this city from a few scattered troops to a present membership of more than 7000, was told by the executive.

International relations are being swept away by the organization of Boy Scout troops in the various foreign countries, Mr. De Groot said. When the boys meet each other and become friends at the international level, friendship often lasts through life, he said.

"It may be truthfully said that in the next twenty years the Boy Scout organizations of the world will be greater power for peace than the League of Nations," Mr. De Groot declared.

Scout troops of every church in the city yesterday attended services in uniform and troop formation.

WAMPAS TO HEAR THEIR CANDIDATES

Aspirants for Offices in Organization Will Speak at Session Tonight

Wampas candidates for officers and directors will be given a chance this evening to prove their qualifications at a session in the Writers' Club in Hollywood.

As chairman, Harry Hammond-Bell, candidate for president, will be in charge of the session, and Ray Coffin, Bell's opponent, will be guest of honor. Sam W. B. Cohn, who is directing the Wampas Publicity Campaign, will be in charge of the session.

Candidates for secretary are Larry Dringarten and Joe Sherman. For treasurer are Fred Brown and Robert Doman. Two vice-presidential offices.

BASE BOTS TO FEATURING PROLOGUE OF WAMPAS
Stars of the cinema and stage are to vie with a star of the baseball diamond at the Wampas Prologue of the 17th last.

This became apparent yesterday with the signing of "Base Bots," home-run king, to present an act at this year's fair. Ruth will demonstrate how he is able to connect with the sphere for almost any while.

It is a novel all his own and he will closely parallel the procedure the country since the close of the world series last fall.

RULING DUE IN DIETRICH CASE TODAY

Cromb Will Appear to Hear Decision on Plea for Dismissal

Elmore A. Cromb, salesman accused of having slain Jacob Dietrich, aged Wall-street nurseryman in the so-called "flower-pot" murder, will appear before Municipal Judge Ballard at 2 p.m. today at which time the jury will rule on the dismissal motion entered by Attorney S. A. Hahn at the close of the preliminary hearing Friday afternoon.

Hahn moved for dismissal on the grounds of insufficient evidence to convict after he had presented a surprise witness whose testimony in many points corroborated the "flower-pot" version as told on the stand by Mrs. Margaret Cromb, pretty 32-year-old wife of the defendant.

The surprise witness, Police Lieutenant Russell, who investigated the case, said that he had been found in his house adjoining the nursery, said that there was blood on the ground in the nursery where Mrs. Cromb had testified she had been attacked by three Mexicans.

Russell further identified a flower pot introduced into evidence as the one cited by Mrs. Cromb. Several human hairs, the same color as that of the slain man, still clinging to the flower pot when it was introduced by Attorney Hahn.

Cromb was arrested on complaint issued after T. C. Felts, surprise prosecution witness, has told Judge Dietrich, Danaham, prosecuting the case, that he had seen a first in which Dietrich had been knocked down by Cromb on the night of December 4.

At the close of Friday's hearing Judge Ballard took the defense motion to dismiss under advisement. The hearing covered nearly three days before Judge Ballard.

RUM SQUAD ENCOUNTERS REAL LIONS

Raiders Go Away Quickly; Made-believe Girls Used as Arrest Decoys

Adventures in which Nubian lions and men garbed in feminine attire played roles featured the week-end liquor raids made by George Contreras, head of the District Attorney's rum squad, and members of his staff.

The lions made their appearance in Belvedere, where Contreras and two of his operatives, all disguised as telephone "trouble men," entered a house near 2848 East Fifth street. After searching the house and finding nothing, the three men started to the children's yard. As they opened the gate, they found themselves facing three full-grown lions.

Contreras stuck his spine into a telephone pole, and beat both his men over the fence by two slivers," he admitted. "The three crossed the street, arrested A. Hernandez and confiscated a twenty-five gallon still and seven gallons of liquor. The lions, they learned later, are pets but not particularly fond of strangers.

Later in the same afternoon, disguised two of his men as women, making them wear women's hats and coats, they entered "Gita" out for a joy ride to 217 East Sixth street, where he summoned Raymond Ideker to the door of the car and asked for "some liquor for the girls."

Maloney sold the liquor, the officers said, and the place was raided immediately, a 150-gallon still, 180 gallons of whiskey and thirty-nine barrels of mash being discovered. Maloney, his wife and Mr. and Mrs. C. L. Jenkins were taken into custody.

Thirteen other arrests were made in the series of week-end raids.

PROGRAM TOLD BY WORKMAN

(Continued from First Page)

Long Beach because the breakfast extension is more desirable than Long Beach's standpoint than ours. The extension will give Long Beach a better chance.

"In view of this fact Long Beach might well enter into friendly negotiations with Long Beach with a view of approving a compact which will insure the establishment of a unified airport for the port district plan by the people of both communities would clear the way for the extension of the government's program."

CITY AIRPORTS TO BE STUDIED

(Continued from First Page)

Field, Santa Monica, and the use of March Field at Riverside for bombing practice. He also made a study of the officials of the aeronautics bureau of the Department of Commerce, on matters brought up by representatives of the department while in Los Angeles recently.

He will deliver lectures practically every day before service clubs and similar organizations in forty eastern States.

THE LANCER
(Continued from First Page)
Lancaster city is absolutely appalling. It is paining to understand why, in the circumstances, farming is such a poor job. Although the city is eating less meat than before, it required \$60,000 cattle, 1,400,000 calves, 2,500,000 hogs and 4,000,000 sheep to keep New York tables supplied.

ITALIAN MARQUIS DIES
MARINO (Italy) Feb. 6. (AP)—Marquis Capone, Marquis of Capone, vice-president of the Colonial Institute of Rome, died suddenly while at his study today. He had visited the United States several times.

THE CORNERSTONE OF Life Insurance

In 1843, when The Mutual Life—the oldest life insurance company in America—began business, the cornerstone of life insurance protection in America was laid.

For 84 years, the Mutual Life has stood every test. Today, it has more than seven hundred and ninety-eight million dollars in the protection and benefit of policyholders, it has paid more than TWO BILLION DOLLARS in 1926, it paid:

Death Claims \$34,432,750
Endowments \$ 3,804,000
Dividends \$35,005,000

Time has only served to increase the financial strength and prestige of this, the oldest company. Through the wars, epidemics, hard times and panics of eight decades, the Mutual Life has stood every test. Today, it has more than seven hundred and ninety-eight million dollars in the protection and benefit of policyholders, it has paid more than TWO BILLION DOLLARS in 1926, it paid:

Death Claims \$34,432,750
Endowments \$ 3,804,000
Dividends \$35,005,000

GIRLS WATCHED IN DEATH QUEST

Green Case Suspects' Faces Under Surveillance

Gang Members Believed to Be Hiding in City

Detectives Keeping Tabs on Three Apartments

The apartments of three women under surveillance by police officers last night as they sought to solve the mystery of the death of a young woman, who was shot to death by a band of men last Tuesday night in back of a house at 1030 South Bonnie street.

Since the murder, according to reports of Detective Cline, in connection with the investigation, police officers have kept a close watch on the three apartments. The girls were dropped from the investigation, but the police, it is known, are still watching them. The girls were dropped from the investigation, but the police, it is known, are still watching them.

POLICE SEEK KIDNAPERS OF WOMAN

Fair Said to Have Robbed Matron After Holding Her Captive in House

Police were asked yesterday to search for two young men who, according to a police report, kidnapped a woman, Margaret Blumauer, 60 years of age, 1500 Cortes street, held her captive for several hours in a room near Glendale and Glendale streets, then beat her severely and robbed her of her money and jewelry. The request was made by the woman's husband.

According to a police report the woman said that her husband reported that she was taken from a downtown room where she was working Saturday night. She was taken to a room near Glendale and Glendale streets, then beat her severely and robbed her of her money and jewelry. The request was made by the woman's husband.

ALWAYS TRUE
The scollaw swings around
curves at speed that's not al
could be seen what he was
most mail-order
times the scollaw's course is
and retribution sleep; you
your boy going strong and
seems his for hope. He's
for speeding now
cheerily he grins as he dips
from men and then repeats
He's warned by brooding
trais, who read his code
wiles; still, in defiance of
he hits up sixty miles.
There ought to be a law
ing such as he, his conduct
course and ray, a given
to sea. Among the ports of
times he is a heavyweight,
not pushed for his crime
either law or code. I say, "I
dent, Gaffer Wad, don't
heard and wall; the scollaw
gets the ax, and justice
fall. The scollaw runs up
road and I repeat, "I say,
some day he'll feel the
good for all his beauty
He rushes by me in a
tears my face off, and I
The gods will yet, and I
reckless too." He bumps
on from behind and comes
and green, and I repeat,
day he'll feel the
means. I am content to let
slide until his hour is come.
I see him grimly rise to
muffled drum I know that
must prevail; I know that
knaves who at this writing
jail and others in their
scollaw comes wild
but still he repeats, "I say,
retribution may be slow,
there in the end. There is
comfort in the thought that
might must pay for all the
had wrought upon some
day."

DIET and HEALTH

by Dr. L. Hunt Bates

CONTROL OF COMMUNICABLE DISEASES. (Part 5.) ENTAMOEBIASIS

I get not a few inquiries from correspondents who state they have a chronic diarrhea with mucus and blood, and request a paper about the diet and treatment.

As you know, I always advise you to go to a reliable up-to-date physician for a complete examination for any trouble. In the case of this acute condition of the bowels, he would not only make an examination of the body, including a rectal examination, but he would also have an examination made of your bowel movement.

Now this examination is extremely important for it will determine if certain infections which may cause a dysentery with blood and mucus are present. If the doctor finds that you would have to have a special diet but you would have to go to bed and have active medical treatment also. (And, naturally, the habits which favored the resistance so that an infection got a foothold, would also have to be corrected.)

I am going to write about an infection of this type today, in carrying out my plan to give you concise reviews of the Public Health Report of December 17, 1926. This type is the dysentery that is caused by a little microscopic animal organism called Entamoeba.

Entamoeba is a microscopic animal organism called Entamoeba. If you have ever examined some stagnant, marshy water under a microscope, you have seen the ordinary, nondescript-looking amoeba.

This disease is known as Entamoebic Dysentery, and is acute, in the first place, with pain and griping and tenderness and many watery stools; then it may become chronic with mucus, or it may become latent and apparently cured, when some dietary or other hygienic indiscretion will precipitate it again. The disease is most prevalent in tropical countries, and the warm, damp, swampy part of the country, where occupations are apt to bring them into contact with contaminated water supply.

It may be caused by drinking water from a contaminated source, or by eating food, such as fruit, vegetables, truck farming, railroad construction, truck handling and other fields of work, for instance.

The following will give the data from the Public Health report:

(1) Infectious agent: Entamoeba histolytica.

(2) Source of infection: The bowel discharges of infected persons.

(3) Mode of transmission: By drinking contaminated water, and by eating infected food, and by hand-to-mouth transfer of infected material; from objects soiled with discharge of an infected individual, or of a carrier, by flies.

(4) Incubation period: Unknown. During course of disease and until repeated microscopic examination of stools shows absence of Entamoeba histolytica.

(5) Methods of control:

(1) The infected individual and his environment.

(2) Recognition of the disease: Clinical symptoms, confirmed by microscopic examination of stools.

(3) Isolation: None.

(4) Immunization: None.

(5) Disinfection of the bowel discharges.

(6) Personal hygiene: Cleaning.

(7) General measures:

(1) Not drinking water unless the supply is known to be free from contamination.

(2) Water supply should be protected against contamination, and the supply should be exercised over all foods eaten raw.

There is another type of acute and chronic dysentery which is caused by a germ (bacteria) of vegetable life, the dysentery bacillus. This is a very severe dysentery, which causes a dangerous illness and sometimes is not infrequently fatal. (It sometimes has a striking resemblance to the amoebic dysentery, but it is caused by a different organism.)

(3) General measures: Cleaning.

(4) Personal hygiene: Cleaning.

(5) Disinfection of the bowel discharges.

(6) Personal hygiene: Cleaning.

(7) General measures: Cleaning.

SOCIETY

BY JUANA NEAL LEVY

Most of the poor, overworked artists of the Latin Quarter of Paris have taken the opportunity to run away from town between the international shows of autumn and spring and to spend postcard greetings to their friends from the Riviera, Italy, Northern Africa, Spain and America.

Those remaining in Paris are staging a series of one-man and group exhibits in galleries between Montmartre and Montparnasse and on fine days joining in out-of-door shows in one or the other of these two quarters.

Mrs. Train Embree has sailed for New York, where she will pass some time with her father, Arthur Train, creator of "Tut" and "Tut," and a well-known novelist.

Portraits by Mrs. Leslie Cotton are on view in London at the Alpine Club Gallery.

After reading for six years on the sunny island of Mallorca, Mr. and Mrs. Thomas Jones, California artists, have found a Paris winter too severe and returned to their Mediterranean section.

For a departure, they sent a show to New York for spring display.

Artists remaining in Paris last week gathered at the studio of Ben Shelden, the St. Louis sculptor, for a fancy dress party. Those finally included included Ben Shelden, the St. Louis sculptor, for a fancy dress party.

Buckley MacGurran, the California artist, has been notified that his picture, "The Japanese," which he offered for sale in aid of the French government, has been acquired by the French government.

MacGurran came to Paris five years ago from the University of California.

An exhibit comprising works by twenty-five members of the American Art Association opened last week at the association's headquarters, 4 Rue Joseph Bara, Paris. Exhibitors included: Charles M. Gilman of Philadelphia, Norman Mason, Ernest Dickman, J. Barry Brown, Martin Berman, Wallace Mervin Philadelphia, Frank H. Deane of Philadelphia, Michael Perrell, S. Giesbrecht of New York, and others.

Mr. and Mrs. W. H. Mann of California, who are in Paris, are registered at the Grand Hotel de Milan.

CORNERMAN WAFFLES
Soak one cupful of cornmeal with boiling water to cover. Cool and add to it one and a half cupful of sifted flour, four level teaspoons of baking powder, half a teaspoon of salt, and one and a half level teaspoons of sugar; mix well and beat in the well-beaten yolks of three eggs, one and a quarter cupful of milk, and three tablespoons of melted butter; mix well and just before baking add the stiffly beaten whites of three eggs and bake in well-greased waffle iron.

BREAD AND JELLY FUDGING
Cover two cupfuls of stale bread cubes with two and a half cupful of milk; add one level teaspoon of salt and let stand ten minutes; pour beaten yolks of two eggs and sugar over the mixture; mix well and top with bits of bright, tart jelly and cover all with a meringue of stiffly beaten whites of two eggs and four tablespoons of sugar; bake in a slow oven forty minutes.

PURÉE OF LIMA BEANS
Cover one and a half cupful of dried lima beans with cold water and let stand overnight; drain, place in a saucepan with half a sliced onion.

Mrs. W. O. Henshaw of Los Angeles, Miss Elizabeth Watson of California, Mrs. James O. Croft, Miss Mary Harwood and Miss Miriam Marble of Los Angeles.

Joseph Schilder, who is traveling in Italy, has apartments in Milan, where he is registered at the Grand Hotel de Milan.

Frederick Lyon has been stopping at the Hotel Excelsior in Berlin, Germany, where he is registered at the Hotel Excelsior.

HOUSEHOLD SUGGESTIONS

Stains on Marble
A half-lemon dipped in salt and rubbed on the stain on marble will remove them very readily. Let stand for an hour and then wash off with clear water.

Close the Door
When having coal put in the cellar be sure the cellar door leading to the house is closed. Otherwise, you will have that fine coal dust all over the furniture on the first floor.

Cool Them First
Let all foods cool thoroughly before placing them in the refrigerator. Not only do warm dishes cause the ice to melt wastefully but the keeping quality of the food will be destroyed.

Hidden Ribbons
If you will tie the ribbon of your chemise or slip at the bottom of the left shoulder strap instead of the center, you will avoid finger ribbons peeping out above the neckline of your dress, should the dress slip down at any time.

An Economical Stove Polish
Potato water is excellent for cleaning stoves. It will remove all soot and if the stove is polished with a chamois afterward, it will look like new.

Shampoo
Add a few drops of oil of camomile to each quart of gasoline you use in shampooing clothes. It will dissolve the gasoline and entirely remove the disagreeable odor.

That Shabby Furniture
Ordinary grades of oak and stained wood furniture that have become shabby can be removed cheaply and attractively at home. Sandpaper the old finish off and paint carefully white, gray, ivory or any shade you desire. If you are of an enterprising nature you might even aspire to floral designs in places. Furniture of any kind, once treated with this method, will be greatly improved.

LEGION CLUB SETS DATE OF BANQUET

Five Judges of Municipal Court Will be Guests of Honor March 1

The third annual banquet of the American Legion Luncheon Club will be held March 1, next, at the Elks, it was announced yesterday by William O. Horton, president of the service men's organization.

An attendance of approximately 200 is expected at the dinner, which will differ from previous ones in that the general public will be permitted to attend.

Mendel Silberman, chairman of the arrangements committee, pointed out which is as follows: Leonard G. Horton, John Quinn, Walter Brinkley, E. (Snapper) Ingram, Earl Brown, Stuart Patton, Archie Vernon, Walter E. Tuttle, Leo McArdle, John Homa and Ed Riden.

In accordance with a custom inaugurated when the first annual American Legion banquet was held, the organization has chosen a group of prominent citizens to give the toast.

The group of speakers will include Judge Leonard E. Horton, Judge William E. Rosenbaum, Raymond I. Turner, Dale A. Stafford and Samuel R. Shale.

REAL ESTATE LAW COURSE ANNOUNCED

A course in law relating to real estate covering material for the State Bar's examination, will be given in the Extension Division of the University of California, beginning today at 7 p.m. The class will be instructed by Attorney Marshall P. McDonald and includes the fundamental principles governing the purchase and sale of real property; Deeds; Trusts; mortgages; liens; judgments; Torrens title law, leases, and mechanic's liens, giving a thorough preparation for the examination.

CONTRACT BRIDGE - THE NEWEST GAME

By E. V. Shepard
(BRIDGE AUTHORITY AND AUTHOR OF TEXT-BOOKS ON THE GAME)

II. CONTRACT BRIDGE LAWS
(From "Win at Bridge," Copyright 1927, by E. V. Shepard)

(This is the second of a series of articles on contract bridge. It includes the laws of the game as adopted and copyrighted by the Kinetic Club of New York City, January 1, 1927. The summary is by E. V. Shepard, editor and author of the series. Tomorrow's article will deal with Conventions of Cards.)

The "Laws of Auction Bridge" govern Contract Bridge except in scoring.

All honors held in one hand, either as trumps or as no-trump, yield 100 points bonus; four trump honors held in one hand count 100 points; four honors holding four not scores.

Tricks bid are scored at Auction Bridge values. Only the number of tricks bid are scored. Why not turn the full number of tricks bid, his advantage score in each honor count 50 points for each uncompleted trick, over and over again.

REVOQUES
The regular penalty of two tricks for the first revoke is followed at contract bridge, but the penalty for subsequent revokes on the same hand is 100 honors points awarded to opponents for each such revoke.

From One Woman to Another
Have the salt from frosting ice cream, dry and use again. Lemons should be warmed before squeezing to obtain the utmost juice.

Pongee is a most practical and attractive material for the little girl's frocks.

The dark closet will be brighter if white and woodwork are painted.

Meet Your Neighbors

By VALERIE WATSON

SEE WAS-AND NOW
She was my very own. I'll tell you the story of her life. The Times. And she did more than that. She won friends. They have survived across the years, and every week has added to the list.

After a time she reported days and nights returned to the University at Berkeley. When square-top and degrees were handed out one announcement day Frances made the journey across the stage and received her sheepskin from the hands of some pompous personage. That was one of her first journeys.

Back she went to San Jose and promised herself that she'd work for a whole year; wash the dishes, water the lawn, and make tarts for the neighbors. The promise held for three weeks.

The local paper carried only a dab of theoretical news, and one day La Frances, sunny-haired, blue-eyed, and with a complexion like the inside of a peach, persuaded the editor that he could use a drama page.

She started her editor, and presently the promise went the way of many others of its kind.

The first details, and they don't matter, anyhow. But one day she wrote a smiling interview with Douglas Fairbanks. He was under the stars in his dressing room, and she wrote a smiling interview with Douglas Fairbanks.

She wrote a smiling interview with Douglas Fairbanks. He was under the stars in his dressing room, and she wrote a smiling interview with Douglas Fairbanks.

RECORD FOR LENGTH OF TRIAL NEARS

Estrada Army Action Will Soon Establish New Mark for Longevity

In United States Judge Remondino today does not rule favorably on a motion by the defense for a directed verdict of acquittal of Gen. Enrique Estrada and eight other defendants now on trial on charges of violating the American neutrality laws by sending an armed expedition against Mexico, the Estrada trial will set a record for longevity here.

The Estrada trial, which is being held in the United States District Court of Southern California.

The prosecution has put more than 100 witnesses on the stand during the past five weeks and it is estimated that the trial should last for nearly as many to present.

Two of the chief witnesses against the defendants are the two men who were charged with the planning of the trial and they were charged by the government to testify against their former comrades in arms.

Judge Remondino is expected to rule on the motion tomorrow.

GAZ MASH PREVIEW
Property owners on Fifty-fifth street, at Pershing street, have petitioned the Council to see that gas mains are installed prior to paving so that the pavement need not be torn up at a later date. The Council referred the matter to the Board of Public Utilities.

Portraits by Duchess to be on Exhibition

Beginning today and continuing for two weeks there will be an exhibition of portrait sketches, including a group of portrait sketches from "The Duke's" collection, by the Duchess of Rutland, in the Biltmore Galleries.

This will be the first exhibition of portrait sketches by the Duchess to be held in the Southwest. The Duchess is the mother of Lady Diana Manners, who played the role of the Madonna in "The Madonna".

The exhibition will be held in the Biltmore Galleries.

LUTHERAN CHURCH GETS NEW PASTOR

Rev. J. George Dorn, first assistant pastor of the Lutheran Church of Omaha, Neb., was installed as pastor of the Holywood Lutheran Church yesterday.

The charges of the congregation to the pastor were spoken at the morning service by Rev. George G. Hillman, secretary of the western division of the American Lutheran Church.

The charge of the pastor was spoken at the evening service by Rev. H. J. Yerlin. Rev. Dorn's first sermon will be delivered at the morning service last Sunday.

THE LAST WORD
By ALMA WHITAKER

SIR GALAHAD DEMODE
Sir Galahad of tradition was a pure and noble knight, brave, dauntless, courtly—the perfect gentleman—even if John Ruskin does make him a bit of a prig.

For a while it seemed that he was to be still something of an ideal for modern men to aspire to. Modern men were wont to evolve a Sir Galahad quality, and even some lectures I heard being addressed to politicians, rather suggested the idea that courtly manners were to be added to bravery and the protective charms of these our missions of the law.
